

ELITE2000 Specifications

IBM Compatible Information Display System

Hardware:

- *Software-only is also available.
- Pentium 4 3.0 GHz Processor computer.
- Keyboard & Mouse.
- 256 Meg RAM memory.
- Internal 3.5 " floppy disk drive.
- 40 Gig (or better) Hard Drive.
- 64 Meg AGP Graphics card with TV Out (Composite).
- 52X CD-ROM.
- Windows XP Professional.
- 4 USB ports.
- Sound Card (integrated).
- 10/100 Network Interface Card (integrated).
- 17" VGA Monitor (comes with Creation systems only).
- 2 Speakers, & Microphone (comes with Creation systems only).

Warranty:

- Standard three years parts and labour warranty on all hardware systems.

Optional Hardware:

- Single pass color flatbed scanner (for Creation systems only).
- Digital Camera (for Creation systems only).
- Graphics Editing Software (for Creation systems only).
- Weather station options for localized weather information.
- Multimedia controllers for control of devices such as VCR's, DVD players, MPEG playback units, Audio/Video switchers.
- MPEG2 Decoder Software.
- Contact closure cable for schedule changes.
- Time Synchronization device.
- Network cards, modems and/or null modem cables (for communications)
- Ring Rebooter (reboot head-end system via phone line).

Text Elements:

- Windows compatible font styles & sizes.
- Automatic Anti-Aliasing of fonts for smoother edges on characters.
- Text Effects including: standard or custom color, underline, italics, bold, outline, blink, shadow (depth, color & direction), background color & pattern, justification (left, right, center).
- 3D and Blended text color effects.
- Time and Date display.
- Local weather information from optional weather stations: Ultimeter, Davis, Texas Weather Instruments.

Horizontal Crawl Line:

- Crawl line can be created and placed anywhere on any page.

Graphics Elements:

- Compatible with common standard graphics formats including JPG, GIF, BMP and PCX.
- Color blend background generator.
- Custom sized rectangles.
- Various overlay effects including: blur, brightness adjustment, tint, greyscale and color blends.
- Frame options for graphics and rectangles including style (raised, lowered, bumped & simple), color and width.
- Analog clock and weather gauge functionality.

Scheduling Elements:

- Page specific dwell time.
- 74 transitions (wipes) available.
- Transition speed settings.
- Advanced scheduling allowing pages to display: starting at a specific date and ending at another date, only during certain times of the day, on specific days of the week.
- Time loops allowing certain parts of the schedule to begin at specific times.
- Multiple schedule capacity.
- Pages can be sequenced to display in any order.
- Flexible / non-linear scheduling.
- Sound file support for voice over effects.
- Animation file support with required drivers including: MPEG 1, MPEG 2 and AVI.

Operational Characteristics:

- Room for thousands of text and graphics pages based on the amount of free hard disk space.
- 800X600 or higher resolution.
- Support for custom resolutions of different aspect ratios.
- Mouse driven menu with keyboard accessible shortcuts.
- Spell checker with customizable dictionary.
- Support for single additional video channel using specific software elements.
- Audio ducking of background during audio file playback.
- Integrated page tracking.
- Schedule start on power up.
- Automatic file download from Internet sources.

Additional Features:

- Clock synchronization to master clock.
- Automatic display of schedules on contact closure recognition.
- General Purpose Interface to send or receive contact closures.

Specifications are subject to change without notice. Effective February 2, 2005
