Horizontal Crawl Line:

- Crawl line can be created and placed anywhere on any page.

Clock / Date Display:

- Time and Date can be placed anywhere on any page in a text format.
- Analog clock display can be scheduled and displayed on or between any pages. Choose from 4 different digitized clock faces.

Colors:

- 16.7 Million available colors to add to text or backgrounds.

Graphical Elements:

- Includes a library of over 900 proprietary graphics to be used as back grounds for text pages.
- Color blend background generator.
- Custom sized rectangles.
- Multiple rectangles can be placed on a page.
- Various overlay effects including: blur, brightness adjustment, tint, greyscale and color blends.
- Frame options for graphics and rectangles including style (raised, lowered, bumped & simple), color and width.

Scheduling Elements:

- Page specific dwell time.
- 74 transitions (wipes) available.
- Transition speed settings.
- Advanced scheduling allowing pages to display: starting at a specific date and ending at another date, only during certain times of the day, on specific days of the week.
- Multiple schedule capacity.
- Flexible / non-linear scheduling.
- Pages can be sequenced to display in any order.

Operational Characteristics:

- Room for thousands of text and graphics pages based on the amount of free hard disk space.
- 800X600 or higher resolution.
- Support for custom resolutions of different aspect ratios.
- Mouse driven menu with keyboard accessible shortcuts.
- Spell checker with customizable dictionary.
- Support for single additional video channel using specific software elements.
- Integrated page tracking.
- Schedule start on power up.

Remote Communications:

- Use the communications package to send and receive pages and new schedules to remote sites.
- Do communications via modem, null modem, cable, direct connect cables or network. (modems, network cards, null-modem & direct connect cables optional)

Additional Video Channels:

- The TextPro Sr. can be expanded to up to 2 video channels in a single computer (Display System) or up to 3 video channels with Program/Preview (Creation System).

Additional Features:

- Clock synchronization.
- Automatic display of schedules upon contact closure recognition.
- General Purpose Interface to send or receive contact closures.

Specifications are subject to change without notice. Effective February 2, 2005
